

DISASTER RECOVERY AND BCP

Disaster Recovery and Business Continuity Planning can be expensive and technically complex. Our expertise in this field enables businesses and their IT divisions to achieve their requirements most cost effectively in today's ever changing technological environment.

Key Benefits

- Regulatory compliance
- Business protection and reputation
- Financial security

Key Features

- Integrated business and IT plans
- Technology roadmap
- Highly structured IT process

Business Challenge

With ever increasing regulatory requirements to show business continuity capability, a strong emphasis needs to be placed on a Disaster Recovery strategy integrated with a credible Business Continuity Plan.

Disaster Recovery is, therefore, not only a technical challenge, but also a business process one. The problem is to marry the two together to meet the business needs with a technical solution that is flexible, sustainable and supportable, at the appropriate cost.

BCP is a similar challenge, with particular industries, such as finance and insurance, having to comply with ever stricter regulatory requirements such as Sarbanes-Oxley.

Our Solution

Initial Assessment

The key to designing any good Disaster Recovery strategy or Business Continuity Plan is to agree the core requirements of the business. Amiiatas have the analytical business skills and experience required to help clients establish accurate requirements which need to be satisfied with any Disaster Recovery or BCP plan.

Matching business requirements to technology

Once an accurate understanding of the business requirements is established the process of examining whether the technology is fit for purpose can commence. An optimal solution may make use of a range of technologies including networking, clustering, HA software, and various replication technologies to fulfill the business requirements. The objective is to create a cost effective fully integrated technology and business process plan that has the confidence of all stakeholders, though a clear implementation strategy with ongoing ease of demonstration capability .

About Us & Our Approach

We pride ourselves in working in partnership with our clients to ensure business objectives are met. No matter how difficult or complex the project may be, we always work as a team and ensure all of our stakeholders are successful. We are open, honest and are trusted by our clients to honour our commitments.

Service is our business and customer satisfaction our goal. We have a can do ethos which means that we will always deliver what has been asked.

Key Deliverables

Successful Disaster Recovery and BCP depend on working closely with our clients. Amiitas will undertake due diligence to completely understand the technology landscape and business Disaster Recovery and BCP requirements. Our clients should expect the following:

- Initial inventory accuracy check of applications, servers and business owners
- Gain understanding of all of the target DR / BCP applications
- Map present capability against requirements and identifying deltas
- Design a technology roadmap to address the delta
- Planning for the remediation
- Implementation, testing and documentation of the required remediation.

The Amiitas Advantage

Proven Track Record of Experts

Our service delivery experts have real operational experience gained from holding senior management and executive positions at many global and blue chip companies such as Morgan Stanley, Goldman Sachs, Motorola, HBOS to name but a few. This wealth of experience, coupled with our customer diversity means that optimal solutions can be implemented in short time frames according to our customer's requirements.

Vendor Agnostic and Market Knowledge

We hold a vehement vendor agnostic position when it comes to selecting products and tools. We firmly believe in maximising the use of existing client investments and will not try to sell you something that we do not believe you require. Our extensive knowledge of the marketplace allows us to provide our clients with the advice they need when additional investment is deemed necessary.

Delivery, quality, results and value

We are business people who pride ourselves on exceeding the expectations of our clients through the quality of service we deliver and value we create. We only have one agenda, to ensure that our client's business objectives are successfully achieved!
